Summary

I am a results-driven software developer with strong experience in building full-stack applications. I use my expertise in **C#, ASP.NET Core**, and **Web API** to develop back-end systems using modern architectural patterns. With 2 years of professional experience, I have developed dynamic front-ends using **JavaScript** and **jQuery**. Driven by a passion for continuous learning, I have also built projects with modern frameworks like **Angular** and **TypeScript** to expand my front-end capabilities. I am committed to crafting high-quality, maintainable code to ensure long-term project value and reduce technical debt.
